Sensuality: 7 CIA agent John Medina and electronics expert Niemi Burdock share a violent past: the two were part of a covert operation that went tragically wrong, resulting in the death of several people. Now, five years later, their paths cross again and John, whose love for Niemi has only grown over time, is determined to keep her in his life for good. Having spent the intervening five years living a solitary, staid existence--due to feelings of guilt over the ill-fated operation--Niemi is somewhat reluctant to reenter the shadowy world she once inhabited. Still, she can’t resist the lure and excitement of danger when John asks her to join him on his latest mission to discover the origins of a deadly new explosive already in use by terrorists. Concocting a plan to reveal the source of the explosive, the two enter into a dangerous masquerade, walking a tightrope between safety and death, while passion boils beneath the surface. Unaware of Johns feelings, Niemi fights her physical response to the legendary agent as her emotions, in frozen limbo for the last five years, thaw with astonishing speed. First introduced in Kill and Tell, agent John Medina is as intriguing as the perilous world he operates in. Watching him in action, à la James Bond, is exhilarating--as is the single-minded intensity of his feelings for Niemi, whose ability to hold her own with John--on both a personal and professional level--and with the host of terrorists, spies, and double-dealers the pair encounter is impressive to say the least. Throw in a couple of chilling chase scenes, some romantic interludes hot enough to peel paint from the walls, and one or two bigger-than-life internationally connected characters, and you’ve got the latest from Linda Howard--a romantic thriller thats sure to be coming soon to a bestseller list near you.

--Lois Faye Dyer

This might just be Linda Howards best work yet. I wanted to reread it as soon as I reached the last page!

All the Queens Men plunges the reader into the world of CIA secret missions. In a refreshing turn, the heroine Niema Burdock is as
adventurous as her male agent counterparts. No reluctant heroine proclaiming her inexperience and shying from challenges here. If you like strong, unapologetic - and believable characters - you will love Niema. And Howard outdoes herself creating the hero, John Medina. He is one of the CIA's most legendary agents (was a character in Kill and Tell), yet Howard creates a superb balance of the self-confidence and coolheadedness required of an agent, with the vulnerability that is a logical result of living a solitary and hidden life. Niema and Medina are well-matched in their spy competencies, and in their intense sensuality. The plot is one of the best Howard has created, with in-depth and complex characters. The love scenes are incredibly intense without being cloying. No annoying euphemisms or falling back to earth - Howard doesn't need them. This is an amazing, intense, and exciting read. The cool assurance and attitude of taking initiatives that the characters exude (without being superhuman) rubs off on the reader. Reading the book made me want to get out and get started with several projects, sports, and/or other activities. Which created a conflict with my great desire to sit down and start the book over! A quality of a good book is that when you finish it you wish for just a few more pages. This is one of those books.
