More Relevant Than Ever

The author of the bestselling The City of Joy presents the tender, inspiring adventure of the scientists, doctors, nurses, victims, and Sisters of Mother Teresa who are battling against the dread epidemic of AIDS. LG Featured Alternate.

My Personal Review:
This book relates the story of how the life and work of two Nobel Prize winners in different fields (the 2008 Nobel Prize winner in Medicine Luc Montagnier, who first identified the AIDS virus, and 1979 Noble Price in Peace winner, Mother Teresa who established the first hospice for AIDS patients in the U.S. in South Bronx, NY.) and many other smart and kind people, work together to address the suffering that AIDS brings, and the work of the scientific community to stop the spread of AIDS and try to find a cure.
This books reflects many of the best and worst attributes of Mankind, and is an incredibly interesting read.

This is one of the best books you will ever read
