Mariëlle Hoefnagels passion as a classroom instructor is evident in this new edition with her Learn How To Learn Roadmap-teaching students to think like a scientist! Mariëlle Hoefnagels is an award winning teacher and professor of biology at the University of Oklahoma. Her concepts-oriented introductory biology text places greater emphasis on the processes of scientific investigation and evolution than any other comparable textbook. Her teaching experience is evident in the book through its use of student-centered art, applications and innovative pedagogy using a “What’s the Point?” focus on relevance and importance. LEARN HOW TO LEARN/SCIENCE AS A PROCESS-Application and Relevancy! Figure It Out-focusing on quantitative skills Pull It Together-Concept Maps Write It Out-asks students to recall and integrate key chapter material. Mastering Concepts questions have been added to each Investigating Life Section in the text. “What’s The Point”- audio clips for each chapter opener. Attention Grabbing Essay, Chapter Outline and Learn How To Learn Study Tips Apply It Now-Application based readings Burning Questions-questions from Mariëlle’s own class!

MORE CONSISTENT EVOLUTION COVERAGE- Investigating Life: each chapter’s capstone concept focuses on a scientific study that shed light on an evolutionary topic. In each case, the emphasis is on how scientists developed and tested a specific hypothesis.

MODERN APPROACH TO GENETICS- The genetics unit has been rearranged to combine the material on gene function with DNA structure.

CONNECT PLUS AND LEARNSMART- Hoefnagels 2e has market leading text assets and it has now entered into the realm of text specific digital tools with Connect Plus and LearnSmart. Users who purchase Connect Plus receive access to the full online ebook version of the textbook. About the Author: Mariëlle Hoefnagels is assistant professor at the University of Oklahoma, where she teaches nonmajors courses in
biology and microbiology, and a course on fungi for advanced botany and microbiology majors. She earned her B.S. in environmental science from the University of California at Riverside, her M.S. in soil science from North Carolina State University, and her Ph.D. in Botany and Plant Pathology from Oregon State University.

Features:
* It is only a Hardcover book
* Colored

My Personal Review:
I am an adjunct faculty member at a local college and I have been very pleased by this textbook. I have been exposed to many different textbooks as a student and a teacher, and this one is my favorite by far. This semester is the first time I have used this text and I have not had to pull out additional resources for my lesson plans (except for the occasion youtube video to make lecture a little more fun). If you are looking for a well written biology text this is one that you should certainly consider. (students, this one is a good one, count yourself lucky if it is your required text!)
