This compilation in the Our WildWorldTM series features Eagles, Falcons, Owls, and Vultures. Birds of prey have captured kids' (and adults') interest—perhaps it's their reputation as fierce hunters at the top of the food chain. This book is packed with information about several species in each group, including habitat, diet, breeding, babies, socialization, and, of course, hunting prowess! Birds of Prey is chock-full of information, with 192 pages, more than 100 full-color photographs and illustrations, and fun facts throughout.

My Personal Review:
I usually rely on our public library for all the books our boys read, but this one caught my 6-year-old son's imagination and he LOVED this book. So this is one I will buy for him to keep. He could not put it down, and asked me to read from it again and again. Of all the kids' books on birds, this one is great. Even I liked it, and I am no fan of vultures!
