My Personal Review:
This book is based on a true story about Bob Lemmons, a African American Cowboy. The pictures are outstanding representations of the story. It is a tale of a cowboy and his ability to ride with wild horses. He has the ability to lead the horses into thinking that he is one of them. Yes, a wild horse! This book could be used as an introduction to biographies or cowboys for young people. I would read it to 5-10 year old children. It is wonderfully written and would be a asset to any school or public library.
