Excellent Textbook

In this text, students not only read about business, they experience it firsthand in every chapter through a variety of highly involving activities that no other textbook can match. Students appreciate its up-to-date real-life examples, its carefully integrated in-depth coverage, its lively conversational writing style, and its eye-opening contemporary graphics. With its video exercises, integration of international examples throughout the book, coverage of current events, exploration of ethical issues, and activities that foster critical thinking, this book conveys the excitement and flavour of business better than any other textbook. Each chapter begins with On the job: facing a business challenge, a vignette that attracts students interest by vividly portraying a problem faced by a real businessperson. Each chapter ends with On the job: meeting a business challenge, a simulation which expands on the chapter-opening vignette and asks students to solve the challenge by applying principles in the text and selecting the best alternatives from the choices offered.

My Personal Review:
The book is very useful. It shows you the beginning of all business subjects. Its a great fundamental business book
