Convair B-36: A Comprehensive History of Americas Big Stick
(Schiffer Military/Aviation History) by Meyers K. Jacobsen

Conovair B-36: A Comprehensive History of Americas Big Stick is a collaborative effort edited and co-authored by Meyers Jacobsen exploring the history of one of SACs air giants, the six-engine Convair B-36. From the origins of the use of six engines on

This outstanding book is a must have, particularly for those interested in Cold War aircraft. This physically large book is positively packed with technical details, photos, and personal accounts from those who served with the aircraft. A great coffee table book, and a definitive source on anything B-36! Although I don't own any, I would like to add any one of the photo books suggested by Amazon as a companion. I've always been fascinated by this large aircraft, especially after seeing the example at the Museum of the USAF (Dayton, OH). You won't be disappointed!
