Richard Walker, BSc, PhD, is editorial consultant and author of DKs Encyclopedia of the Human Body. Trained originally as a zoologist, Richard now holds a PhD in physiology and biochemistry. He has taught both secondary school and university students, and now enjoys a successful career as a writer and consultant. Among his human biology books for DK are the Guide to the Human Body, 3D Eyewitness Human Body, Visual Dictionary of Human Anatomy, and Brian and Body in the Megabites series.

My Personal Review:
This is a serious comparison with Netter's anatomy atlas... (NOT)
We use this book all the time with the kids for quick reference. The quality is far better than anything else out there. It is less than 100 pages and looks bigger than a 750 page book. Pages are really thick and illustrations are great, but no details at all. I strongly recommend a copy if you are a person between the ages of 8 and 108....
