My Personal Review:
I used this textbook for 3 of my 4 children and I plan to use it for my 4th child when he reaches the 8th grade. One thing I really like about this book, is that the reading level is age appropriate. So many homeschool books are either too simplistic or too difficult for the recommended grade level. BJU books are right on target! The information is broken into neat, easily scheduled sections, and the review questions at the end of each unit help the student to remember what they've learned. This was one of the best books we've used over the years.
