Discover the power of volcanoes and earthquakes -- from hot spots and black smokers to devastating tremors and tsunamis. Here is an exciting and informative guide to the violent eruptions and tremors that shape our planet. Superb color photographs of lava flows and clouds of ash, plus specially built 3-D models, offer a unique eyewitness view of volcanoes and earthquakes, from the forces that drive them to the devastation they cause. See streams of red-hot lava, the earliest seismographs, rocks that float in water, the bodies of people killed by the great eruption of Vesuvius, and pools of bubbling mud. Learn how animals can detect earthquakes before people, what causes a fire fountain, how buildings are made to withstand earthquakes, where to hide during an earthquake, and why the earth shakes. Discover how the Mercalli scale works, how new islands are formed, why the sands of Hawaii are black, how volcanoes affect the ozone layer, what makes magma explode, what a pyroclastic flow is, and much, much more!

My Personal Review:
THIS DK BOOK IS IN FIRST PLACE.
I AM VERY INTERESTED ABOUT VOLCANOES AND EARTHQUAKES ALOT.
THIS BOOK WAS JUST THE BEST ONES I READ IN MY DK BOOK COLLECTION.DK BOOKS ARE THE BEST.AND VOLCANOES ARE THE BEST FOR KYLE ADRIAN VENTURA
