My Personal Review:
Overall this is an awesome book, it gives a brief history of the world's most famous forgeries and fakes, from Art, money, and documents to religious and medical works, made by some very interesting and crafty people. I highly recommend this book, however if you are interested in one particular subject you may not like that it's really brief on each subject, or if you are looking into a new line of work, this book doesn't exactly give you a "how to" on making your own money sorry, even still this book is a very interesting read.
