Fuzzy bugs, feathery bugs, lacy bugs, and leathery bugs are among the tempting textures that kids of all ages will want to identify (and play with). David Carter has created a Bugs touch-and-feel book filled with tons of tactile fun.

My Personal Review:
My friends passed this book (and other Bugs in a Box Books) along to me after her son regretably out grew the context of the books (age 7). I know he didn't really want to give away one of his favorite books but soon submitted to his mother. My daughter and I (she is 1.5 yrs old) read this specific book every night. She loves it! It is the greatest feely book we have and we have quite a few. It is well constructed and has a variety of textures for little hands. I also like the size of the book. It is easy to sit on the bed with her on my crossed legs and have the book in front of us on the bed. She gets so excited when it is bedtime because she knows we will be reading the Feely Bug book. Thanks Miranda and Simon for giving up one of your treasures to become one of ours.
