Follow the Line

Once You Follow, You Cant Stop

Follow the line on a journey from the city to the country, from the sky to the ocean, from morning till night. Laura Ljungkvist uses her trademark continuous line style to create the perfect counting book for young children. Each scene contains questions designed to get children looking, counting, and thinking. For example, in the underwater picture, children can count seashells, turtles, and the legs on an octopus. Each page is packed with colorful, artful objects and animals—and young counters can follow the line from the front cover to the back cover, through each stunning scene.

My Personal Review:
Laura Ljungkvist is a wonderful author/illustrator, and she has outdone herself with her third book, Follow the Line. I highly recommend that all parents include this book in their home libraries. I always buy books for childrens occasions, and this is the book I keep on hand to give any child because it appeals to all. The narrative follows in the tradition of Margaret Wise Brown's classics. The words are simple and elicit conversation between child and reader. The pictures are graphic, simple and bright, and they captivate even the youngest children. Older children enjoy following the line. With imaginative and innovative illustration, this book is a technical feat. Follow the Line will introduce early readers to the concept of following the stories left to right, through the pages, to the end. Children will gain pre-reading skills and not even be aware of it. Buy this book, enjoy this book, and give this book.
