My Personal Review:
Told in a first person narrative, a fictional diary of sorts, GRIMSCRIBE (His Lives and Works) is one eerie read. I quote the inner sleeve "Grimscribe is the faceless scientist of nightmare: an addict of the paranormal who relates his awesome adventures with the denizens of a shadow world that is at once half-mad and inescapably ours." This book delivers us into the heart of horror, unrelenting and bleak in aura, Lovecraftian style. Although there are many similarities between old H.P. and Ligotti, I oblige myself in mentioning that Ligotti does have an infectious prose that sinks just as deep as the Cthulu Mythos. Ligotti laces his pages with such an intense dose of "unsettlingness" that the stories stick to your gut long after you've read them. Nightmare inducing, intellectually disturbing, a carnival for the absurd. This one is a must for anyone who enjoys getting a severe case of the creeps.
