My Personal Review:
I love Cole's books and how much fun they are for children and adults. The ones about puberty and sex are even better when the adults read them to the children. They address a lot of areas that might be of concern in a humorous, nonthreatening way. The idea that a book could dissuade children from asking questions of their parents is moronic. If their relationship is sound, the book will cause more questions which is good. I especially enjoy how upset and hysterical her books make some of the more repressed and uptight readers!
