Excellent!

An account of one family's life in a redwood forest describes how the Colfaxes lived without electricity, running water, or a phone, and how they educated their sons, three of whom were accepted to Harvard on full scholarships.

My Personal Review:
Couldnt put the book down. Throughout the story of their family's survival in the country with all the challenges of actually living off the land - dealing with the elements, living without amenities, having no money to buy decent equipment, and needing even the small children to contribute to make it work - I felt I was right there with the Colfaxes. It made me laugh and cry as I lived through the challenges with them, watching each child grow stronger with each set-back, seeing each one's individual strengths emerge, and the tremendous sense of self-confidence that came with it.
What a way to grow up! I know their book has inspired generations of home-schoolers. I didnt expect it to be such a fresh and enlivening experience to read even today. I feel so grateful to the Colfaxes for telling their story.
