My Personal Review:
This is a great story about siblings and about being the youngest child. The story is well told and includes certain refrains that kids will love. The illustrations of the kids bring the story to life and captures each character. Although this book is meant for older kids, this story is a favorite of my two year old. He loves being read the story, and he loves the illustrations and has begun to repeat certain words from the story. This is a great book and both young and older kids will enjoy it.
