Imagine…a ladder without steps, a clock without hands, a racket without strings, a kiss without a mouth…anything is possible. Use your imagination and your world will be transformed! Look closely and see what you can see. Then look again and imagine…

My Personal Review:
Imagine, is one of the most outstanding childrens books I have had the privilege to review this year.
Inside the covers of this book, children will be able to interact as they imagine many different scenarios, for example; what different animals would look like with other animal heads or bottoms, and they will giggle up a storm as they give it a try. That is just the beginning of the fun as this read explodes into countless imagining for your child.
The illustrations are priceless and add flare to a book that is already top of the notch.
Parents, do not miss this one. Your children will be absolutely delighted with this book and it will give them hours of entertainment as their imagination soars. I give it my highest recommendation.
