My Personal Review:
This is the third book in the "Inside the World's of Star Wars" series. All of them are absolutely incredible! They take you on an in depth tour of the locations in the "Star Wars" galaxy. If you have ever looked into the background while watching the "Star Wars" movies, and wondered about the complex environments depicted by George Lucas, this book is for you. It gives complex detail about every aspect, of every location, of every scene from the movies. It show's you all of the location's on Tatooine, the Yavin base, the Death Stars, Eco Base, Yoda's hut, the Ewok village, and much, much more. Anyone curious about the colorfull worlds of the "Star Wars Trilogy" should purchase this book. For much more information on the variety of characters from "Star Wars," the "Visual Dictionary" series is also a must have, and to go in depth with the ships and technology, "Star Wars, the Incredible Cross-Sections" is another great series from DK.
