Author Kenneth Updike presents the most complete and authoritative text available for those wishing to restore their Farmall Cub, Lo-Boy, and Cub Cadet, from their inception in the 1940s through the end of production. The detailed text includes hard-to-find information on the development and design of each model, with all the relevant information on implements, improvements, serial number dates and codes, engines, and carburetors. This book covers the history of Farmall Cub and Cub Cadet, from the early days following the birth of Cub Tractor, to the White Demos and Lo-Boys, through the Cub Cadet concept, development, and history, to the expanding Cub Cadet line with higher horsepower models, to the IH 82 Series Cub Cadets, and finally, the end of the line for Cub and IH.

My Personal Review:
This is a great reference book for International Cub Cadet owners. You can find many facts about these mowers and Cub Loboys and Cub Tractors and find all the serial number changes. Highly recommend
