Principles of Patient Assessment in EMS by Kirsten M. Elling

A concrete approach to assessing patients and situations in the field that presents the relationship between assessment findings and pathology in an informal yet informative manner. Includes detailed descriptions of physical exams and history-taking methods as relevant to respiratory, cardiac, neurological, abdominal and psychological traumas. Case studies and Web activities are integrated throughout to provide a realistic context and enhance material.

My Personal Review:
Yes, as an RN, this was useful to me, just what I needed, just what I expected to give me specific information - Julia Ehrmann
