This new casebook is designed to introduce property law to twenty-first century law students. It covers the standard property topics with a blend of familiar and modern cases selected to appeal to contemporary students; it also includes sections on intellectual property and environmental law. Like other books in the Interactive Casebook series, the accompanying electronic version allows students immediate access to the full text of cited cases, statutes, articles, and other materials in the Westlaw database. In addition, the electronic version includes extensive photographs, maps, diagrams, and audio clips that help students understand the case materials.

My Personal Review:
This book is probably the easiest book to read. The rules are laid out and the interactive xplanabook on the website is really well done too. This book has made property my favorite class. The wry humor makes the hypotheticals in the book much more memorable than they would be.

If you've got a class tailored around this book, you're in for a treat. My only complaint is that the Xplanabook literally expires within 1 year, so you won't have access to the content later. But overall, the book is really awesome! I wish McGeorge would have interactive case books for every class, especially if they are tailored like this one.
