Sandworms of Dune

Breathtaking And Satisfying Conclusion

At the end of Frank Herberts final novel, Chapterhouse: Dune, a ship carrying a crew of refugees escapes into the uncharted galaxy, fleeing from a terrifying, mysterious Enemy. The fugitives used genetic technology to revive key figures from Dunes past--including Paul MuadDib and Lady Jessica--to use their special talents to meet the challenges thrown at them.

Based directly on Frank Herberts final outline, which lay hidden in two safe-deposit boxes for a decade, Sandworms of Dune will answer the urgent questions Dune fans have been debating for two decades: the origin of the Honored Matres, the tantalizing future of the planet Arrakis, the final revelation of the Kwisatz Haderach, and the resolution to the war between Man and Machine. This breathtaking new novel in Frank Herbert's Dune series has enough surprises and plot twists to please even the most demanding reader.

My Personal Review:
A breathtaking and satisfying conclusion to one of the greatest epics in science fiction.
Frank Herberts genius cannot be underestimated when you look back at the original Dune Chronicles, nor can anyone underestimate the size and scope of the challenge that Herbert, Jr. and Anderson faced when they picked up the torch and decided to carry on with the works Frank Herbert did not live long enough to complete. SANDWORMS OF DUNE is immensely satisfying, an epic with galactic scope and rich characters -- both familiar ones and new ones. You cheer for them all.
