Spanish Revival Architecture by Tina Skinner

Something For Everyone!

More than 500 period photographs explore the Spanish Revival movement (1915-1940) in architecture. Original Spanish and Mediterranean buildings inspired patrons on the grand tour in Europe to build for themselves these sturdy homes in the 20th century that reflect a strong Mediterranean heritage. Tiled roofs and floors, arched windows and passageways, and stone walls and floors characterize the style. Exquisite details are explored, both inside and out, from residential, commercial, and public projects. Sections in the book focus on exterior details including outdoor rooms and staircases, verandahs, patios, and courtyards, pools, fountains, chimneys, and garden gates. Inside, revel in beamed ceilings, fireplaces, tile details, lighting and flooring. In addition to dozens of private residences, this book tours retail and commercial spaces, churches, schools, libraries, theaters, and private clubs. Work by celebrated architects who helped pioneer the Spanish Revival movement is featured, including George Washington Smith, Wallace Neff, Gordon Kauffman, Morgan, Walls and Clements, and many others. Also, some architectural renderings and floor plans are included. Architects, designers, and remodelers will find inspiration for today’s structures on every page.

* Notes:

My Personal Review:
This book is one of the finest and most filled with detail on Spanish Revival Architecture that I have ever seen. It is superbly arranged by category with pictures of architectural details such as doors, steps, lighting fixtures, etc.. The designs are actual photographs taken of the structures and details when they were originally built. It is also the most comprehensive guide to the proper furnishings for the structures as used in the period. Architects should take note of the scale and balance of design as opposed to many things built in recent years that have totally out of proportion exaggerated features. This book is a must for anyone vaguely interested in Spanish
Revival Architecture, whether an architect, historian, owner of a structure of the period or planning a structure of this style.
