The Spirit of African Design is an illustrated home-living guide to African-inspired style, with gorgeous photographs, fascinating cultural and historical information, and plenty of ideas and resources for interpreting styles, from Marrakesh to Capetown. Explore the treasures of the past and revel in the exciting work of today's young designers. 250 full-color photographs.

My Personal Review:
This great book shows in text and photographs the various and beautiful ways that African artifacts: traditional fabrics, sculpture, paintings and drawings, popular and ubiquitous souvenir items and - most importantly - African-inspired motifs and designs, can be incorporated into (or the inspiration for) sophisticated contemporary room decor. The authors have worked for the international design company IKEA, so their slant is design, rather than anthropology. They come at it in an energetic and engaging way. The result is a source book that is a visual treat, and a great home tour. The rooms - living, bed, kitchens (in which W. African design elements are adapted to ceramic tiles, with gorgeous results) and more - are lively, smart, and modern. You notice in reading the text, and drooling over the abundant photos of the beautiful and stimulating rooms, that well-known European textile designers of the sixties (the Finnish company Marimekko, for example) owe a debt of gratitude to indigenous African cloth designers. This is something I hadn't ever realized. A lovely, inspirational, and worthwhile book.
