Written by a team of acclaimed professionals in the field of interior design and beautifully illustrated with 350 full-color photographs and 500 drawings, this is the book to turn to for solid advice, instruction, and up-to-the-minute decorating ideas.

My Personal Review:
I cannot recommend this book highly enough for anyone who intends to decorate or remodel their home. As the slipcase states, it is an unrivaled visual sourcebook with almost 1,000 color photos and illustrations. It is not just full of pretty pictures of someone else's house decorated by experts, but full of projects you can do yourself as you are led through the steps, details and directories of where you can obtain the materials. I've had this book since it came out and have shown it to many friends who have gone out and bought their own copies. An indespensible book for anyone new thinking of undertaking a project themselves, or to afford them the ideas and knowledge to have others do the work for them.
