Even after death, Robert Ludlum remains the master of the international spy caper, and whether this posthumously published new thriller was cobbled together by a real ghost or already completed before Ludlum died doesn’t matter. All the trademarked Ludlum gifts of plotting, pacing, and suspense are on full display in this engrossing mystery about a former covert operative turned private security executive who’s stranded, abandoned, and marked for murder by his old colleagues when he manages to survive an unsurvivable mission. Rescuing renowned philanthropist and statesman-without-portfolio Peter Novak from the clutches of the terrorist who murdered his wife and unborn child, Paul Janson watches, unbelieving, as the plane carrying Novak back to freedom explodes before his eyes. Soon after the first post-mission attempt on his life, Janson begins to put the pieces of the puzzle together, but Ludlum keeps the reader from seeing it whole until the last thrilling chapter. A page-turner that doesn’t let up, this one will leave Ludlum’s fans
hoping there are more unpublished manuscripts where this one came from, a not unlikely possibility. --Jane Adams
