This new book is the first detailed history of the famed 91st Bomb Group.

My Personal Review:
I was very pleased to see this available. I visited Bassingbourn in '07 and obtained special permission to go on base and see the museum in the old control tower of the current RAF base. I had met Robert Morgan, pilot of the Memphis Belle, on three occasions, and read much about the Air Corps in Europe during the war. Also visited many other airfields in the Cambridge area, fighter and bomber. The book is excellent for photos taken during the war of B-17's from Bassignbourn and other fields, plus information on missions and the crews who flew them. Also has photos of the target areas. I have many other books that cover the details better, but the photos in this book really make it a worthwhile addition to my library, and I would recommend it to other AAC enthusiasts. I have long collected the silver 'wings' of pilots, navigators, bombardiers and crewmen of that era, and a book like this assists much in making a connection to the history of those days. -- Terry [...]
