The Rise of the Fourth Reich: The Secret Societies That Threaten to Take Over America by Jim Marrs

Entertaining And Regrettably Not Unbelievable

Throw out everything you think you know about history. Close the approved textbooks, turn off the corporate mass media, and whatever you do, don't believe anything you hear from the government—The Rise of the Fourth Reich reveals the truth about American power. In this explosive new book, the legendary Jim Marrs, author of the underground bestseller Rule by Secrecy, reveals the frighteningly real possibility that today the United States is becoming the Fourth Reich, the continuation of an ideology thought to have been vanquished more than a half century ago.

This concept may seem absurd to those who cannot see past the rose-colored spin, hype, and disinformation poured out daily by the media conglomerates—most of which are owned by the very same families and corporations who supported the Nazis before World War II. But as Marrs precisely explains, National Socialism never died, but rather its hideous philosophy is alive and active in modern America. Unfortunately, most people cannot understand the shadowy links between fascism and corporate power, the military, and our elected leaders.

While the United States helped defeat the Germans in World War II, we failed to defeat the Nazis. At the end of the war, ranking Nazis, along with their young and fanatical protégés, used the loot of Europe to create corporate front companies in many countries, including the United States of America. Utilizing their stolen wealth, men with Nazi backgrounds and mentalities wormed their way into corporate America, slowly buying up and consolidating companies into giant multinational conglomerates. Many thousands of other Nazis came to the United States under classified programs such as Project Paperclip. They brought with them miraculous weapon technology that helped win the space race but they also brought their insidious Nazi philosophy within our borders. This ideology based on the authoritarian premise that the end justifies the means—including
unprovoked wars of aggression and curtailment of individual liberties—has gained an iron hold in the land of the free and the home of the brave.

For the first time Jim Marrs has gathered compelling evidence that an effort has been underway for the past sixty years to bring a form of National Socialism to modern America, creating in essence a modern empire—or Fourth Reich!

Author Marrss premise that the US is rapidly becoming a fascist state is hardly open to question any more, but his pointing to Nazi Germany as the origin of this trend misses the mark. Nonetheless, this book is a valuable read for all, regardless of the readers political persuasion or positioning on the left or right.

Unfortunately the author damages his work as early as in his Introduction with false facts. For example, on page 1 he states that the bodies of Mussolini and his mistress were left hanging from lampposts. Actually they were hung by their heels from the canopy of a gasoline station in Milan. On page two, Hitlers remains were found by the Soviets, positive identification was made from dental records, and part of Hitlers skull was retained by Stalin as a war souvenir. The two pages about Hitlers possible escape are pure fantasy and at odds with documented history. Even his definition of terms is poor, for example the term Nazi is not a contraction from National Socialist but rather the first two syllables of Nationalsozialismus (one word) pronounced in German as Na-tsi (National is pronounced Na-oo-nal in four syllables). I could go on and on, but suffice it to say, the author plays fast and loose with some facts to spice up his theme when no spicing is needed, and such lack of historical scholarship calls his other facts into question.

Another example might be made of the Skull and Bones Society at Yale. Certainly this was an organization whose members were drawn into the Bilderbergs, Trilateral Commission and Council on Foreign Relations, but casting this college society as a fascist conspiracy group is like condemning the Boy Scouts or DeMolay for the evils some of their members bring about in later years.

Nonetheless, author Marr does identify the most terrifying secret group today that is likely to bring an end to American sovereignty -- the Bilderbergs (B), supported by their agents The Round Table in Europe, and the Trilateral Commission (TC) and the Council on Foreign Relations (CFR) here in the US. These groups are well documented for wishing to end American national sovereignty, imposing global taxes, and wanting to reduce the American standard of living to come into line with the worlds average. They have achieved the European Union, and their next step is to form a North American Union out of Canada, the US, and Mexico with a standard currency, the Amero. These programs are very far advanced, and
the public needs to take action at this very late date. Marr correctly points out that private ownership of weapons in the US acts as a significant curb to these ambitions as does the history of individual freedom in the US.

Marr loses his way in attempting to pin the actions of these groups on Nazis or their influence. Like the Bolshevik revolutionaries, many of the individuals actively working to foster this new One World Order are Jewish (Kissinger immediately comes to mind) -- something that puts them at odds with Hitlers racial underpinning of his state. In addition, Hitler would have maintained his nation-state as the supreme body for world leadership -- today the One World Order types seek a Supra-National Socialist (or Supra-Nazi) world governing body, controlled by them through the management of the political process and public-private partnerships (PPPs). Marrs is correct in his descriptions of these PPP organizations and how the corporate and political worlds are managed by the globalists.

Marr correctly points out that Jimmy Carter was the first President to be catapulted from obscurity by the Trilateral Commission and the Bilderbergs by Zbigniew Brzezinski and David Rockefeller. He also is correct in that the Reagan Presidency was managed to an extreme by these organizations, as were the first Bush administration (Bush himself was a member of all three), Clintons (Bill is also a member of all three), George W. Bush (essentially everyone below Bush are members, and most disconcerting, Obama has been stage-managed from 1983 by Brzezinski and others, and is little more than a front man for the Bilderbergs. Thats why Bill Clinton became so enraged when he saw the Bilderberg and TC support go to Obama instead of his wife -- she was considered to be less manageable than Obama. Kerry was also a Bilderberg, and indeed, so is Chris Dodd, one of the architects of the mortgage mess and Henry Paulson, the man who will be transferring 700 billion dollars from American taxpayers to his Bilderberg buddies. For those who still have doubts concerning this manipulation, consider the Bilderberg action when the gasoline prices reached $4.00 at the pump and McCain began surging in the polls due to his energy policies. The Bilderbergs took swift action in the oil futures market as only they could do, and three months later, high gasoline prices have been forgotten as an economic issue. Hey, folks, thats control that would be far beyond Hitlers comprehension.

So buy and read this book, but soft peddle the Hitler connection. The actual reality is much worse, and probably irreversible due to the propaganda taught in American schools since World War II and sent out every day on American TV stations. For your viewing pleasure, all of the major media outlets (including Fox -- Murdock is a Bilderberg) are owned or controlled by Bilderberg members. Youll never hear OReilly or Hannity on Fox mention the Bilderbergs, Bill Moyers at PBS is PBSs primary Bilderberg member, and the New York Times and Washington Post are little more than Bilderberg house organs. Enjoy yourself -- its later than you think.
