My Personal Review:
I have two small children and have less and less time to cook. This is a great book for someone who wants to serve healthy food fast.

My dad was a terrific cook who did it all without recipes. He taught my mom how to cook but traditionally women in her family don’t cook, so my dad did all the cooking. In keeping with family tradition my brother was required to learn how to cook and I was not.
So I learned to cook after I got married and taught myself using cookbooks so I have an extensive collection. I personally think cookbooks should help make preparing food easier and inspire not intimidate. That is why I love this book. It is designed to make good food simple and easy and tasty.

I would recommend this to the experienced cook looking to save time, the novice cook who wants good food with minimal effort or someone who wants fresh ideas from a cookbook written to inspire instead of intimidate.
