The zany characters who sniffle, soar and shriek through this book will help kids understand the concept of such emotions as joy, disappointment, boredom and anger. The Way I Feel will also show kids how to express their feelings with words. This delightful book is used in homes, classrooms, literacy programs and pediatric clinics across the country. Finally we have a resource which teaches children how to articulate what they feel, wrote a health educator. The imaginative illustrations and superbly crafted verses are sensitive and free of bias and slang.

My Personal Review:
I've used this many times as a Speech Language Pathologist in preschool classrooms with typically developing children and with children with disabilities. This is by far the best book I have ever found to address the concept of emotions for young children. Each turn of the page brings 1 colorful and clear illustration of an emotion with a nice rhyming description of the emotion from a kids point of view. It keeps the childrens attention and does a great job teaching emotions.

Now that I have a toddler of my own, I'm pleased to report that she adores it as well. She asks us to read it to her every night, and she tries to label the different emotions and comments on parts of the emotion descriptions.

This is the best feelings book out there for little ones.
