An Important Book

They Must Be Stopped is New York Times bestselling author Brigitte Gabriel’s warning to the world: We can no longer ignore the growth of radical Islam—we must act soon, and powerfully. Gabriel challenges our western and politically-correct notions about Islam, demonstrating why radical Islam is so deadly and how we can halt its progress.

Brigitte Gabriel speaks her mind:

*Fundamentalist Islam is a religion rooted in 7th century teachings that are fundamentally opposed to democracy and equality.
*Radical Islamists are utterly contemptuous of all “infidels” (non-Muslims) and regard them as enemies worthy of death.

*Madrassas in America are increasing in number, and they are just one part of a growing radical Islamic army on US soil.

*Radical Islam exploits the US legal system and America’s protection of religion to spread its hatred for western values.

*America must organize a unified voice that says “enough” to political correctness, and demands that government officials and elected representatives do whatever is necessary to protect us.

Brigitte Gabriel has fearlessly faced down critics, death threats, and political correctness, and is one of the most sought after terrorism experts in the world. They Must Be Stopped is her clarion call to action. Gabriel thoroughly addresses the historical and religious basis of radical Islam, its frightening encroachment into societies around the world, and its abuses of democracy in the name of religion.

This thought-provoking work stands on its own as a guide to and polemic against Islamist expansionism. For background and deeper insight, I would however recommend Because They Hate, Brigittes autobiography that covers her childhood in Lebanon. Westerners do not understand the culture and psychology of the Middle East, even in this information age. Since most countries in that region are under authoritarian or totalitarian rule, the citizens are for the most part ignorant of concepts like individual and religious liberty, tolerance and the rule of law. These virtues are in fact interpreted and portrayed as weaknesses. In addition, its in the interest of the despots to incite hatred against the outsider in order to distract attention from the poverty and misery that they have caused.

The author unravels cluster upon cluster of misconceptions about jihad, boldly analyses the movements history, identifies its basic beliefs, provides ample warning about the peril facing the free world and shows how to contain and counteract it. One of the books most valuable features is a guide to jihadi formations around the world: where they are based, who their backers are and what theyre targeting. This is not a matter of Right or
Left but a very real threat that ought to unite all those who value Western civilization.

The first part deals mainly with controversial civil rights issues regarding the identification and apprehension of terrorists. Both Presidents Bush and Obama maintain that Islam is a religion of peace of which the minority of extremists is not representative. Gabriel disputes this view, arguing that it more closely resembles a totalitarian ideology and that many moderates are unfamiliar with certain aspects of their own belief system. Violence is not condoned only by a fundamentalist fringe but widely approved of as integral to an inherently expansionist faith that is resurgent under the direction of highly motivated leaders. Her analysis is supported by the facts of history and quotes from the movements source documents.

The author proceeds to reveal the tactics of front organizations. The ultimate goal of both the terrorists and the perceived moderates is a worldwide caliphate under Sharia Law. She exposes the various ways in which western institutions and governments are infiltrated. Petrodollars fund both the violent and non-violent approaches. The difference is that some of the moderates pursue the same goal by means of propaganda, recruitment and negotiating special concessions that run counter to the laws of the host society. For decades the free world has received ample warning through plane hijackings, terrorist acts, murders of civilians, the Iranian Revolution and Taliban rule in Afghanistan but not even 9/11 has properly woken up the West. The 2006 Danish cartoon uproar and the large-scale civil unrest & vandalism in Europe since 2005 should serve as further warnings.

The oppression of women and minority groups in ME societies is vividly portrayed as is the racism that is closely associated with slavery. Ayaan Hirsi Ali who as a child lived in Saudi Arabia for a while, confirms these sad facts in her book Infidel. The Wests postmodernist mindset has opened the gates for multiculturalism to be used as a weapon against it and as a shackle to render it defenseless. The way this works is brilliantly revealed by Stephen Hicks in Explaining Postmodernism. It is vitally important that defenders of freedom understand the concepts of At-Taqqiyya and Ad-Dawa. The first is the craft of deception or permissible lying in order to promote the movement whilst the second is the process of gradual conversion. Networks of charities, madrassas and hospitals have been established throughout the West for this purpose.

The movement has successfully infiltrated the prison systems in Europe & the USA whilst Middle East Studies departments at universities are lavishly funded by oil-rich states, and Sharia-compliant finance is making inroads where it matters. Londonistan by Melanie Phillips exposes how the UK has become a Jihadist financial centre. Western propagandists of the resurgent faith have tried their utmost to hide the facts, undermine the truth and shut down debate. Amongst them is the ever-pious Jimmy Carter who persists
in spreading disinformation, scapegoating Israel and saying peace when there is no peace.

A stirring call to action, the book in its two final chapters also proposes a variety of feasible & sensible countermeasures to halt the infiltration. These include monitoring the hate literature produced & distributed by educational institutions, legislation to protect the police & security services so they may prioritize the physical safety of citizens, and close scrutiny of Sharia Banking and its tangled webs. Above all, the habit of political correctness must be challenged; the first duty of a government is to ensure the safety of its people. By now it ought to be clear from the European example that tolerance of intolerance simply fuels more intolerance. The causes & effects of this dangerous cycle are amongst the symptoms of societal decay examined by The French philosopher Chantal Delsol in her compelling books Icarus Fallen and The Unlearned Lessons of the 20th Century.
