Treehouse Living: 50 Innovative Designs by La Cabane Perchee Company

Living high up in the trees is no longer only a fantasy. A renewed passion for nature, combined with the growing availability of innovative building techniques and materials, has created a burst of imaginative treehouse construction on every continent. Alain Laurens is Europe’s leading architect of such projects, and his company, La cabane Perchée, is internationally recognized for its extraordinary treehouse design, superior workmanship, and ecological responsibility. Treehouse Living includes fifty innovative treehouses in a wide range of styles, all built without driving a single nail into a tree. From a lofty porch for entertaining to a secluded bedroom set amid rustling leaves, from an intimate dining room to a living area complete with spectacular views, this book offers a new way to live well in nature.

My Personal Review:
Alain Laurens and the Team at La Cabane Perchee Company are true Masters of their crafts. The Treehouses crafted and beautifully illustrated in the book defy the imagination. I had no idea treehouse building had developed to this stage. I am just beginning to develop the skills necessary to design and build high-end treehouses for people to live in and enjoyed seeing what is possible. Wish there were more details on the actual construction; especially the out-of-this-world staircases. Hope to see future books from these people, especially if they give more How-To information.
