My Personal Review:
This book takes the song Twinkle Twinkle Little Star and puts it into pictures. We all know babies love to be sung to. Most every book Ive found that takes a familiar song and turns it into a picture book is a hit with my son, but this one deserves special recognition because of the captivating pictures. Each page features photos of 3 stuffed animals (teddy bear, bunny and mouse) experiencing stars in a different way: peering out the window at the night sky, sitting in bed looking at a star mobile, pointing out constellations (not the real ones, I should warn you). My sons favorite is the full page spread of the night sky with planets, a rocket, the moon (he calls them all balls). The last page shows the 3 furry friends snuggled in bed together - making this an ideal bedtime story. The photography is very well done and even after many months I still enjoy looking at this book. I would highly recommend it for any baby from around 6 to 18 months.
