An unparalleled exploration of the mysteries underlying women’s sexuality that rivals the culture-shifting Kinsey Report, from two of America’s leading research psychologists

Do women have sex simply to reproduce or display their affection? When University of Texas at Austin clinical psychologist Cindy M. Meston and evolutionary psychologist David M. Buss joined forces to investigate the underlying sexual motivations of women, what they found astonished them.

Through the voices of real women, Meston and Buss reveal the motivations that guide women’s sexual decisions and explain the deep-seated psychology and biology that often unwittingly drive women’s desires—sometimes in pursuit of health or pleasure, or sometimes for darker, disturbing reasons that a woman may not fully recognize. Drawing on more than a thousand intensive interviews conducted solely for the book, as well as their pioneering research on physiological response and evolutionary emotions, Why Women Have Sex uncovers an amazingly complex and nuanced portrait of female sexuality. They delve into the use of sex as a defensive tactic against a mate’s infidelity (protection), as a ploy to boost self-confidence (status), as a barter for gifts or household chores (resource acquisition), or as a cure for a migraine headache (medication).

Why Women Have Sex stands as the richest and deepest psychological understanding of female sexuality yet achieved and promises to inform every woman’s (and her partner’s) awareness of her relationship to sex and her sexuality.

My Personal Review:
Men answering this query would respond Is this a trick question?. But, as usual, women turn out to be more complicated -- or more insightful. This book entails a fascinating compilation of survey results tied together with threads from evolutionary and interpersonal psychology.
