Wine expert Jens Priewe has revised his acclaimed guidebook to wine, providing his readers with the most up-to-date information on this topic. Tailor-made for the contemporary wine consumer who drinks what he or she likes, this vividly illustrated text discusses not only awe-inspiring vintages, but also unknown wines from countries only recently included on the wine maps of the world. Priewe provides a key to the complex language of wine and illuminates the science of wine making while honoring the art behind its creation. Half the book is devoted to the wine-making process itself; the other half examines the best wines of the world, country by country, and guides the reader to an understanding of the intricacies of wine tasting and appreciation. Illustrated with more than 1,000 color images, including computer graphics that explain the invisible processes of wine making; satellite maps and aerial photos of the world’s most important wine regions; and photographs of individual vineyards by the world’s best wine photographers, Wine: From Grape to Glass will quench the thirst for knowledge experienced by a true wine lover when uncorking a bottle of fine wine. A journalist covering politics and economics for twenty years, Jens Priewe began exclusively writing about wine over fifteen years ago. His books include Italy’s Great Wines and Journey into the World of Wine. A regular contributor to culinary magazines, he lives in Munich.

My Personal Review:
What first stuck me about this book is its visual beauty. Every single page has illustrations, maps, or stunning photographs which cover every imaginable step in the wine-making process. This book manages to give a wide overview of the considerations that go into making a wine, from "grape to glass", but also provides a fascinating level of detail. This book would be perfect for a wine lover who wants to know more, or even as a reference book for a library.
