The Good Stuff

Major David Valentine and his fugitive battalion are the remnants of an expeditionary force shattered in its long retreat from disaster in the Appalachians. Between a raging blizzard, bands of headhunters, and the need to recover wounded soldiers lost during the retreat, Valentine is in for the toughest winter of his life.

And Valentine is losing allies fast. Some of the clans in the region have declared themselves in favor of the Kurians, throwing Kentucky into civil war. But the Kurian overlords have determined that the region isn't worth the effort of another conquest. Their order: extermination.

My Personal Review:
Let me start out by saying that I have read each book in the Vampire Earth series and have enjoyed them all. For me these books are an escape from the day to day grind and I do not get hung up on the details of whether it seems plausible to have a alien race that lives off of human aura take over the Earth. Like all of the books in the series, this book is a page turner which kept me interested from beginning to end. The main character, David Valentine is realistic in that he has flaws, makes mistakes, even gets injured, but like most heros in books, he stands up for what he believes, overcomes those things and tries to make a difference in his world.
